Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 8-27 in Paper No. 5 is acknowledged.
2. Claims 1-7 and 27-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected group and species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 8, 9 and 17-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Suzuki et al, 5,015,430. Note especially column 3, lines 27-33, which states that the slitted tapes may be polished before calendaring. As the tapes are slit, and divided between two calendaring units, it is inherent that there must be two lapping units as well.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 10, 13-16, 21 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki '430 in view of Schlatter et al, 5,658,618. '430 does not disclose wiping the first and second sets of strands with first and second wiping units. '618, figure 5, and column 3, lines 57-65 and column 4, lines 44-60, teach the use of a wiping unit, to clean the strands after processing. It would have been obvious to one of ordinary skill in the art to have provided '430 with wiping units after the lapping but before respooling, to prevent damage due to debris to the final product, as taught by '618, column 4, lines 44-60.

7. Claims 24-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Suzuki et al '430 in view of Meihofer 4,159,808. '430 discloses everything claimed except that the rewind station includes independent tension control for each rewind roller, where the tension control includes magnetic clutch mechanisms. '808, figure 1, in a winding device for flexible webs, teaches the use of magnetic clutch mechanism to control the tension of the winding web on a roll. It would have been obvious to one of ordinary skill in the art to have provided '430 with the tension control in the form of a magnetic clutch to each strand roller, as taught by '808, figure 1, and column 5, lines 51-63, to prevent undue stretching or slackness of the web during winding.

Allowable Subject Matter

8. Claims 11, 12 and 23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other similar methods are cited of interest.

10. Any inquiry concerning the content of this communication or earlier communications from the examiner should be directed to M. Rachuba whose telephone number is (703) 308-1361. The examiner can normally be reached on Monday through Friday from 8:30 AM to 4:00 PM.
